## Star Party is coming- Labor Day weekend 2019

### Why do we love astronomy?

"Astronomy is the ancient challenge we brought forward from the cave days when mankind first bowed to the moon goddess. We have lengthened our eyesight considerably since then with telescopes and curiosity. Superstitions and fears gave way to purpose and hope to encounter other worlds also capable of contact or at least working towards it. We look for answers outside of ourselves and appear civilized enough to answer the questions of others." (from

Yahoo answers).
